

Agrecovery is New Zealand's solution for the safe disposal of unwanted agrichemicals and the recycling of empty containers, drums and IBCs.

WE ARE NATIONWIDE

with more than **70** container collection sites

+ on-property collection for containers, chemicals, large drums and IBCs.

AFTER LAUNCHING IN 2007 WE NOW HAVE...

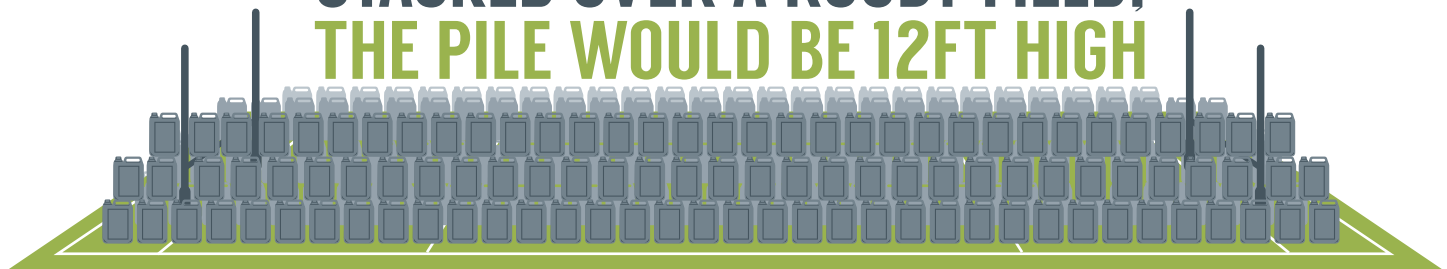

COLLECTED 75,000 KG
UNWANTED OR EXPIRED AGRICHEMICALS

RECYCLED OVER 1 MILLION KG
CONTAINER AND DRUM PLASTIC

WHAT DOES 1 MILLION KG OF CONTAINERS LOOK LIKE?

STACKED OVER A RUGBY FIELD, THE PILE WOULD BE 12FT HIGH

OR IN ENERGY TERMS:

USING 1 MILLION KG OF RECYCLED PLASTIC INSTEAD OF NEW PLASTIC SAVES ENERGY EQUIVALENT TO NEARLY 2 MILLION LITRES OF PETROL THAT'S ENOUGH FOR AN AVERAGE CAR TO DRIVE AROUND THE WORLD 600 TIMES!
